

AMENDMENTS TO THE CLAIMS:

Claim 1. (Currently Amended) A rapidly disintegrating tablet comprising:

~~—at least one active substance~~

~~—silicified microcrystalline cellulose; and~~

~~—optional excipients~~

amoxicillin;

clavulanic acid;

silicified microcrystalline cellulose; and

optionally, one or more excipients,

wherein the tablet is substantially free of superdisintegrants.

Claims 2 – 3. (Cancelled)

Claim 4. (Currently Amended) The rapidly disintegrating tablet according to claim 3 1, wherein the amoxicillin is in the form of amoxicillin 20 trihydrate.

Claim 5. (Currently Amended) The rapidly disintegrating tablet according to claim 3 1, wherein the clavulanic acid is in the form of potassium clavulanate.

Claim 6. (Currently Amended) The rapidly disintegrating tablet according to claim 3 1, wherein the ratio of amoxicillin to clavulanic acid is in the range of 2 :1 to 30 :1.

Claim 7. (Currently Amended) The rapidly disintegrating tablet according to claim 3 1, wherein the ratio of amoxicillin to clavulanic acid is 4 :1.

Claim 8. (Currently Amended) The rapidly disintegrating tablet according to claim 3 1, wherein the ratio of amoxicillin to clavulanic acid is 7 :1.

Claim 9. (Original) The rapidly disintegrating tablet according to claim 1, wherein the proportion of the active substance in the tablet is 5 to 70 % by weight of the tablet.

Claim 10. (Original) The rapidly disintegrating tablet according to claim 1, wherein the ratio of the active substance and silicified microcrystalline cellulose is 0.5 : 1 to 2.5 : 1.

Claim 11. (Original) The rapidly disintegrating tablet according to claim 1 wherein the proportion of silicified microcrystalline cellulose is 30 to 95% by weight.

Claim 12. (Original) The rapidly disintegrating tablet according to claim 1, wherein hydrogenated castor oil is contained as a lubricant.

Claims 13 – 14. (Cancelled)

Claim 15. (Currently Amended) An orodispersible tablet comprising amoxicillin, clavulanic acid and silicified microcrystalline cellulose, wherein the tablet is substantially free of superdisintegrants.

Claim 16. (Currently Amended) A dispersible tablet comprising amoxicillin, clavulanic acid and silicified microcrystalline cellulose, wherein the tablet is substantially free of superdisintegrants.

Claim 17. (Currently Amended) A process for the manufacture of a rapidly disintegrating tablet according to claim 1 comprising the steps of:

- [[•]] blending the ~~at least one active substance~~ amoxicillin, clavulanic acid, silicified microcrystalline cellulose and optionally one or more excipients;
- [[•]] homogenizing the obtained mixture;
- [[•]] sieving the homogenized mixture; and
- [[•]] forming tablets therefrom.
